

Silent Gliss
Roller Blind Systems

The Silent Gliss Advantage

Silent Gliss offers the most comprehensive and technically advanced roller blind systems. Their clean lines perfectly complement modern architecture and interior design. They allow maximum shading with minimum window obstruction.

Quality and warranty

The materials used are rust free and UV resistant for sustained functionality and appearance over time. Extensive testing of our high quality products allows us the confidence to offer a 5 year warranty.

Precision

Experienced specialists assemble every system manually to guarantee perfect fabric roll on and off day after day!

Ease of operation

Spring operated, with elegant metal chain or electric motor, our systems function at the highest level. Experience the Silent Gliss difference.

Easy installation and maintenance

Some systems have click-in brackets and a continuous headrail for easy installation – ‘plug and play’!

Manually Operated Roller Blind Systems

Chain operated systems

Value and functionality

The Silent Gliss 4907 is designed for situations where high quality is needed but at the best price. A simple but sophisticated blind with reliable quality.

Optimal operation

Nothing compares with the high quality roller blind Silent Gliss 4910 when it comes to smooth operation. Even at its maximum size it will work effortlessly with just fingertip operation. Simply the best in class.

For super sized

Even when it comes to extra large blinds we offer the Silent Gliss 4830 or Silent Gliss 4840.

Silent Gliss and child safety

As children grow, so does their curiosity with the world around them. Every day, household objects can be dangerous to infants. Chains and cords from curtains or blinds have been identified as a potential risk to small children.

Therefore, all our chain operated blinds comply fully with the EN 13120.

WARNING

Young children can be strangled by loops in pull cords, chains, tapes and inner cords that operate the product. To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck. Move beds, cots and furniture away from window covering cords. Do not tie cords together. Make sure cords do not twist and create a loop.

Spring operated system

Built-in speed regulator for controlled fabric speed and stop controller to allow the roller blind to be stopped in every position.

System Options

Side-by-side installation

This option allows operation of two roller blinds with one control.

Double bracket

A double bracket offers the possibility to combine two roller blinds in front of one another at an optimum distance for flawless operation.

Side Guided

For sloped situations and roller blinds exposed to wind or heavy ventilation, the side guided option avoids unwanted movement of the fabric.

Click-in brackets

Some systems can simply be clicked into the brackets for a quick and easy installation.

Cassette / Fascia

Discreet, easy to clean and can be fitted flush to the ceiling or wall for a minimal light gap.

Special solutions

Silent Gliss have many years of experience installing blinds in challenging environments. Please contact Silent Gliss if you have an installation that requires a customised solution.

Compact design

The compact and elegant design of parts enables maximum window coverage, with a minimal light gap. Particularly important for side by side installations.

Elegant finish

The option of metallic design brackets offer a sophisticated finish to enhance and add value to the roller blind system.

Choose your favourite bottom bar

The choice of various bottom bar designs and end caps ensures the system adjusts perfectly to every room design.

A Matter of Size

Whether small is beautiful or if size is everything Silent Gliss can offer the perfect solution with the most comprehensive roller blind range available.

	1.8m	2.0m	2.4m	3.3m	5.0m
2.8m	U 4907 kg max. 2.6 m ² max. 5.0	L 4900 kg max. 2.2 m ² max. 6.0	U 4910 kg max. 3.0 m ² max. 7.2

Silent Gliss Move App

Operate curtains, blinds and other electric Silent Gliss systems from your smartphone, tablet or desktop. Whether you are at home or on the road, this reliable and intuitive app allows you to program automatic opening and closing times.

Download the app in the Apple App Store, Google Play Store or Windows Store.

Electrically Operated Roller Blind Systems

Variety of models

Our range includes wired and battery operated systems. Hard wired blinds offer the highest performance and the widest range. Battery operated roller blinds are the ideal solution when wiring to the blind is not possible, e.g. situations such as retro-fit.

Silent Gliss tubular motors

Silent Gliss tubular motors are completely hidden within the blind barrel. Unique features distinguish it from standard systems:

- Virtually silent operation
- The ability to programme intermediate stops
- Built in safety stop if the movement is interrupted

The Fabrics

The Fabric is as important as the hardware when it comes to the quality of a roller blind. Only technically advanced and perfectly produced fabrics guarantee crease free roll on and off.

Silent Gliss fabric collection

A wide range of fabric styles and colours can be found in the Silent Gliss collection. By choosing one of these specially tested fabrics you can be assured of a perfect blind.

Most of our fabrics are Oeko-Tex certified and fire retardant. We provide solar, heat and acoustic coefficients so that you know exactly what to expect in terms of light, glare and heat control.

Digital printing

Why not have your own design on your roller blinds? With modern digital printing we can realise your ideas whatever they may be.

Screen fabrics

Available in different styles and designs, with aluminium backing and various openness factors (transparencies), our wide range of screen fabrics are optimised for perfect hanging, even for larger sized roller blinds.

Colorama fabrics

Available in two transparencies and more than 40 colours, this state of the art fabric brings all the technical characteristics needed, while still appearing decorative and soft.
