

PLAY OF LIGHT WITH
FLEXIBILITY TO DESIGN.

Silent Gliss

WAVE PANEL GLIDE SYSTEM

reddot award 2017
winner

Waves of shade.

The Wave Panel Glide System from Silent Gliss creates the perfect blend of light and shade. The clear, elegant wave forms allow natural light to enhance your room space and give you the freedom to explore an array of visual and shading effects.

Whether used as elegant window treatment or as a striking room divider, there is virtually no end to the creative possibilities of this system.

Winner of the Red Dot Award: Product Design 2017.

CLICK-IN GLIDERS AND CARRIERS

The exceptional functionality of the click-in gliders enables the easy insertion of the carriers into the track. To suit your personal preference, the panels are connected together or separate. Using the Velcro® strip makes it easy to clean and change the fabrics.

FORM SUPPORTS FUNCTION

The system works by attaching curved fabric carriers to two parallel profiles SG 6010 fixed 15cm apart. The carriers transport the fabric panels along the profiles with left or right-sided assembly.

HIGH-QUALITY FABRICS IN SUPERB COLOURS

Choose between a range of fabrics from sheer to opaque to create the atmosphere of the room and rely on the high-quality Silent Gliss curtain make up to complete the picture.

The perfect blend of light and shade.

The Architects of Silence

Silent Gliss is the leading global supplier of premium interior window treatment systems.

With cutting edge technology and a relentless commitment to precision, we develop and manufacture the world's quietest, smoothest-gliding curtains and blinds.

Driven by our customers' needs, Silent Gliss provides bespoke curtain and blind systems complemented by expert technical advice, installation and support services. Silent Gliss stands for innovative solutions, exceptional design and outstanding quality. Swiss engineered since 1952.
